EXECUTIVE SUMMARY

Product-focused **Middle Full-Stack Engineer & AI Integrator** with a strong track record of designing and delivering modern web platforms, scalable SaaS products, and LLM-powered automation systems. Highly proficient across **Python (FastAPI, aiohttp)**, **TypeScript**, **React / Next.js (App Router)**, and relational databases (PostgreSQL, SQLite). Proven ability to bring AI systems into production using OpenAI/Gemini APIs, RAG, and autonomous workflows while maintaining high availability, robust security standards, and seamless payment gateways (Stripe, Payme, Click).

TECHNICAL COMPETENCIES

Programming Languages:

Python

TypeScript

JavaScript (ES6+)

SQL

HTML5 / CSS3

Frontend Development:

React.js

Next.js (App Router)

Tailwind CSS (v4)

Chart.js

Responsive UI/UX

SSR / SSG

Backend & Architecture:

FastAPI

Node.js / Express

SQLAlchemy

Drizzle ORM

aiohttp

aiogram 3.x

RESTful APIs

AI & Automation:

OpenAI API

Google Gemini API

RAG

LangChain

Prompt Engineering

n8n

AI Agents

Database, DevOps & Auth:

PostgreSQL

SQLite

Git / GitHub

Vercel

Render

OAuth 2.0

Rate Limiting

Stripe / Payme / Click

WORK EXPERIENCE

TechCorp Innovation Center — Middle Full-Stack Engineer / AI Integrator 2024 – Present

- Engineered 24/7 intelligent LLM-driven conversational agents and high-throughput backend APIs for enterprise client engagements.
- Spearheaded responsive frontends using Next.js and Tailwind CSS, increasing overall user conversion by 35%.
- Architected and fine-tuned PostgreSQL databases and asynchronous FastAPI endpoints for optimal latency and fault tolerance.

SoftSolutions IT Company — Full-Stack Software Engineer 2023 – 2024

- Delivered responsive web interfaces, robust backend data pipelines, and third-party API service integrations.
- Implemented multi-tier authentication protocols (OAuth 2.0, JWT, httpOnly cookies) and stringent input validation to safeguard user data.

KEY PROJECTS & OPEN SOURCE

ResumAI Hub — AI-Powered Resume & Cover Letter SaaS GitHub ↗

Stack: Next.js (App Router), React, TypeScript, Tailwind CSS v4, PostgreSQL, Drizzle ORM, OpenAI API, Stripe, Payme, Click

- Built an end-to-end multi-language AI SaaS enabling users to generate ATS-optimized resumes and contextual cover letters.
- Implemented live split-screen editor with real-time A4 PDF rendering, skill proficiency visualizers, and ATS keyword scoring.
- Integrated localized and international payment processors (Stripe, Payme, Click) and enterprise-grade session security.

Javohirbek AI — 24/7 Autonomous Telegram Business Bot GitHub ↗

Stack: Python, aiogram 3.x, aiohttp, AsyncOpenAI, Google Gemini API, Render.com, UptimeRobot

- Developed a 24/7 autonomous Telegram Business responder with persistent multi-turn memory and sliding-window rate limiting.
- Engineered a provider-agnostic LLM interface allowing zero-downtime switching between Gemini and OpenAI models.
- Achieved 99.9% uptime on cloud containers using custom HTTP /health check instrumentation and automated keep-alive polling.

Full-Stack API Explorer & Management Console GitHub ↗

Stack: Python, FastAPI, SQLAlchemy ORM, SQLite, JavaScript (ES6), Modern CSS

- Developed clean RESTful API endpoints coupled with an interactive browser dashboard for rapid project and record management.
